#### **Supporting Documentation:**

- While BCBSNC does not publish specific language *only* about pulmonary diagnostics (e.g., spirometry, diffusion studies), the **general same-day E/M policy** applies:
  - If you perform a **pulmonary diagnostic test** and provide a **clinically necessary E/M service**, you must show that the E/M visit:
    - addressed problems *beyond* ordering or interpreting the test
    - involved history/MDM not inherent to the test itself
- BCBSNC explicitly states that some tests are considered **part of the E/M** or part of another service *unless clearly separable*.

#### **Investigation tips:**

- Verify documentation supports both the procedures and a significant and separately identifiable E&M service.
